README.md 2023-12-10

## pda

Ultimate repo containing the material in bite-sized pieces for learning Python for Data Analytics

## **Table of Contents**

- 1. Python for Data Analytics 1 (pda1)
  - 1. Variables and Data Types
    - 1. Variables and objects
    - 2. Numeric types
    - 3. Strings
    - 4. Booleans
  - 2. Basic Operations
    - 1. Arithmetic operations
    - 2. String operations
    - 3. Boolean operations
  - 3. Data Structures
    - 1. Lists
    - 2. Tuples
    - 3. Sets
    - 4. Dictionaries
  - 4. Conditionals
    - 1. if/elif/else
    - 2. Defining variables with if/else
  - 5. Control Flow
    - 1. for loops
    - 2. while loops
    - 3. break and continue
  - 6. List/set/dict comprehensions
  - 7. Functions
    - 1. Defining functions
    - 2. Arguments and parameters
    - 3. return statement
    - 4. Lambda functions
  - 8. I/O and context managers
    - 1. Reading and writing files
    - 2. Context managers
  - 9. Error handling
    - try/except
    - 2. raise
  - 10. Pandas objects
    - 1. Series
    - 2. DataFrames
  - 11. Slicing, indexing, filtering

README.md 2023-12-10

- 1. Slicing
- 2. Indexing
- 3. Filtering
- 12. Groupby operations
  - 1. Groupby method and object
  - 2. Aggregation
  - 3. Transformation
- 13. Concatenate, merge, join
  - 1. Concatenate
  - 2. Merge
  - 3. Join
